## **RE: WATER TARIFF ADJUSTMENT NOTICE**

The cost of water production has gone up tremendously due to the continuous increase in cost of electricity, water Treatment chemicals, Labour and various Statutory levies.

It has become necessary to review the tariff upwards to meet the revenue required for cost recovery infrastructure maintenance, putting in place of new facilities to meet the ever increasing water demand and improvement of the existing water supply facilities. In the new tariff, objectives of equity, fairness and resource conservation have been taken into consideration.

The proposed tariff adjustments below has been authorized for public consultation by Athi Water Services Board (AWSB) and the Water Services RegulatoryBoard (WASREB) on the 24<sup>th</sup> of February 2020.

## RWL PROPOSED NEW TARIFF STRUCTURE FROM FERUARY 2020
